

Drone / UAV 3D Mapping

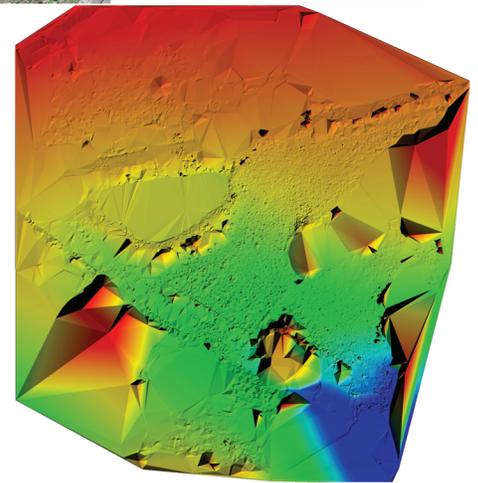

We are pioneers in creating 3D models of real world places from un-manned aircraft. Our team develops detailed 3D models up to 1 cm. resolution. This allows us to collect data where we never could before!

Accurate 3D model

Aerial photo from UAV

High res. DEM

Features

- 1 cm accuracy flying at a height of 200'.
- Buildings, bridges and open land.
- High resolution DEMs.
- High resolution topographic maps.
- Scan to BIM (Revit, NavisWorks)
- Scan to CADD (AutoCAD, Microstation, ProE)
- Scan to 3D (Max, Maya, SketchUp).
- All popular formats supported.

About Planet 9 Studios

Planet 9 Studios is the leading supplier of data and software featuring 3D real world locations.
