

# RayGun™ - Social Navigation

Planet 9 has developed a unique, 2D/3D navigation and social networking application that can run on many mobile platforms. Developed originally for Boeing and the US Army, RayGun is robust and scalable. Users and their friends are shown in their correct locations so that they can share routes, text chat, share photos and videos or use our new push-to-talk feature.

O2 Flame

Intel Platforms

nVidia Mobile Chipsets

Mitac Mio
